RATE CHECKUP

ONLINE WATER RATE CHECKUP TOOL

Rate checkup is an analysis tool designed to help public water systems of all sizes calculate water rate schedules. This tool provides user friendly screens to input data, analyze and validate data, forecast water rates based on customer groups, and generate custom reports with charts in various formats.

Input Data · Analyze Data · Forecast Rates · Visualize Results · Export Reports

Features at a Glance

- Secure web-based 24/7 access
- Built-in rate calculations
- Access for multiple users from same organization
- Generate user fees for multiple customer groups
- Compare historical rates
- Forecast multiple rate checkups
- Generate reports in multiple formats
- Available for water systems of any size
- User guide and technical support

Easy Data Input and Validation

- Data saved automatically through page progression.
- Self-paced completion allows exiting the system and returning to the last saved section to complete.
- Immediate validation upon completion of a section.
- Errors detected and highlighted.
- Input data from rate structures, water usage reports and financial statements to calculate revenue comparison.
- Run what-if scenarios and compare multiple rate checkups.

Real-time Forecast Rates

- Set parameters for the forecasting section to generate projections based on program default settings and baseline settings.
- Override data to provide customized rate calculations.

Visualize Results & Export Reports

Generate on demand reports with charts showing historical and forecast figures. Generate report in PDF or excel format to easily share or print.

Partnerships

Rate Checkup Online Tool was made possible with the leadership, vision and funding from Kansas Department of Health and Environmental (KDHE) Capacity Development Program in collaboration with WSU Hugo Wall School of Public Affairs - Environmental Finance Center, Kansas Municipal Utilities, and WSU T3.
